SUMMARY

Aspiring AI Engineer with hands-on experience in Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, and workflow automation. Skilled in developing AI-powered applications, training machine learning models, and building intelligent automation solutions using Python, REST APIs, and modern AI frameworks. Passionate about developing scalable AI systems and solving real-world challenges through artificial intelligence.

SKILLS

Languages	Python, SQL, JavaScript.
AI/ML	Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, XGBoost, OpenCV
Generative AI	LLMs, Prompt Engineering, RAG, Fine-tuning, Embeddings, LangChain, LangGraph, Hugging Face (Transformers), AI Agents, MCP.
Backend	FastAPI, Streamlit, REST APIs
Databases	PostgreSQL, MySQL, FAISS, ChromaDB
Development Tools	Git, GitHub, Docker, n8n, Activepieces, Cursor, Kiro, Antigravity.

EXPERIENCE

AiOps intern - Tarcin Robotics

Sep 2025 – Jun 2026

- Developed AI-powered automation workflows for intern onboarding, hackathon management, automated communication, task allocation, and AI-based scoring systems using n8n, Groq API, Google Sheets, and Drive .
- Contributed to the GeoOps platform by developing a rule-based recommendation module to prioritize educational institutions using OSM, NAAC, location-based scoring, and PostgreSQL.
- Developed an Event Management System featuring certificate automation and review validation processes to enhance event operations and participant verification.

PROJECTS

AI-Powered Automated Resume Shortlisting System

[Link](#)

- Developed an AI-powered recruitment automation system using n8n, Gemini 2.5 Flash, and AI agents to analyze resumes, evaluate candidates, and automate the shortlisting process.
- Integrated Notion, Google Drive, and Gmail APIs for resume management, structured AI evaluation, and automated candidate communication workflows.

Agentic RAG-Based Study Assistant for DevOps & MLOps

[Link](#)

- Developed an intelligent RAG-based study assistant for DevOps and MLOps learners with context-aware response generation.
- Implemented Retrieval, Planner, and Tutor AI agents along with guardrails and scalable workflows for reliable and interactive student support.

AI-Based Investment Generator using ML [LR]

[Link](#)

- Developed a machine learning-based investment recommendation system using Logistic Regression to generate personalized investment suggestions based on user financial profiles.
- Performed data preprocessing, feature engineering, and model training using Python and Scikit-learn, evaluating the model with Accuracy, Precision, Recall, and F1-score.

EDUCATION

KLN College of Engineering, Madurai, Tamil Nadu

2022 - 2026

Bachelor of Engineering in Computer Science and Engineering

CGPA: 7.32/10

CERTIFICATIONS

[Google Cloud Generative AI](#) | [Python Programming](#) | [No-Code AI Agent Builder](#) | [Automate Everything with n8n](#)

EXTRA-CURRICULAR ACTIVITIES

- Maintained a consistent LinkedIn technical content series by publishing daily AI learning posts and weekly AI Build Log articles, sharing hands-on projects and emerging AI technologies.
